

CAT I Flight Training System

Precision Flight Controls, Inc.

The CATI system is our most affordable and versatile entry level PCATD on the market today. The CATI Flight Training System includes our Cirrus Yoke, Throttle Quadrant Console, Digital Avionics, Remote Instrument Console, Cirrus Rudder Pedals and FAA approved software.

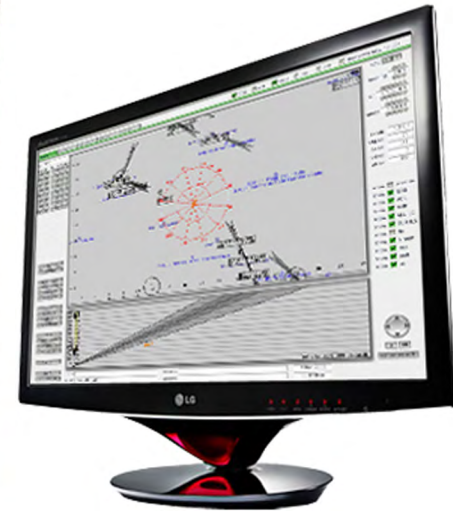

The CATI is FAA Approved for 10 hours towards your instrument Rating and is a perfect tool to enhance your training no matter what skill level you have achieved during your flying career

Practice Makes Perfect:
Perfect your skills at your convenience at home or in the office.

Versatility:
Choose from three styles of high quality cast aluminum yokes and many aircraft specific Throttle Quadrants.

Engineered:
Our uniquely engineered throttle quadrants are easily changed without tools. Choose from SEL, MEL, Turboprop and Jet.

Peace of Mind:
PFC products come with a Lifetime Warranty and trade in policy to insure years of enjoyment.
